

ABSTRACT OF THE DISCLOSURE

A display device for at least one modular merchandise unit having a substantially flat base includes a base, a housing supported by the base, a cover, at least one wheel connected to the base, and at least one shelf supported in the housing for receiving the base of the merchandise unit. The housing includes parallel first and second side walls and a third side wall connected to the first and second side walls. The cover is disposed on an upper portion of the first, second and third side walls.
